DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Mayenberger (U.S. 5,910,153).

Mayenberger discloses the claimed invention in figures 1-7, an apparatus for creating an opening in a tissue vessel including a piercing element (28) movable relative to a hollow tissue trap member (18), wherein a cutting edge (23) formed on distal end of said hollow tissue trap member (18) for cutting tissue; an introducer (1) located substantially around a least part of said hollow tissue trap member (18) at proximal (21) of said hollow tissue trap member (18); wherein said piercing element (28) and said hollow tissue trap member (18) are movable relative to said introducer (1); furthermore, at least one locking element configured to releasably lock the hollow tissue trap member (18) relative to the introducer (1) (see col. 7, lines 21-46), wherein the locking element can be a cam element, a tab, a pin (10) or a collar; and the piercing element (28) at least partly or fully from the device (as shown in figure 4 and col. 7, line 46 to col. 8, line 22).
